cots not included

Buried under two feet of snow or cooking in the hot summer sun, the Quite Lite Shelter Kit can provide a safe haven. Easily deployed in bulk for disaster relief, or stacked in the garage when not in use as a wilderness getaway. The lightweight, quick assembly, extreme durability, easy to clean, and compact storage features of the Quite Lite Shelter make it perfect for a wide variety of uses.

OPTIONAL:
Power Panel

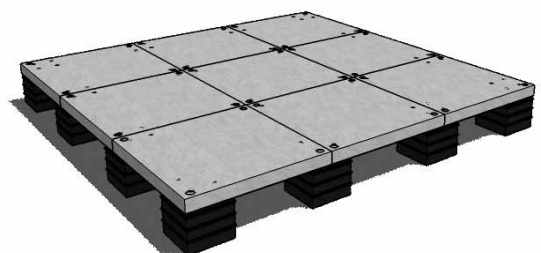

HEATING AND COOLING

Heat can be supplied by a standard plug-in-the-wall electric space heater or small propane tent heater.

Cooling can be supplied by easily cutting a hole in a wall panel with a hand saw to accommodate a standard window air conditioner.
